UN-Water Project on Safe Use of Wastewater in Agriculture

Wrap-up and Concluding Session:

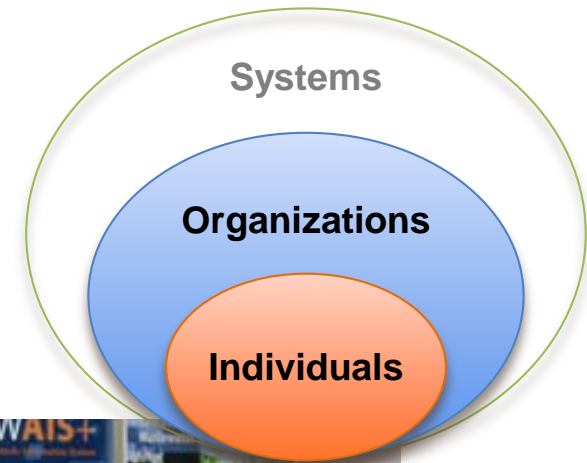

Expectations

Dr. Jens Liebe, UNW-DPC

Goal

Qualified people in **key organizations** to formulate the right policies and put into practice the safe use of wastewater in agriculture.

- Materials and methods
- Dissemination strategy
- Capacity building action plan

Expectations of the Organizers

Action

- Foster interdisciplinary approach, formation of a platform to promote the issue
- Contribute to awareness raising and public acceptance (resource, not waste; part of a solution to water shortage, food security; ...)

Expectations of the Organizers

- Revisit the challenges and possible solutions you described – anything you can implement?
- Formulate goals which lead to actions/Future action plan (i.e. 3 most important interventions)
- Promote formulation of guidelines, policies

Safe Use of Wastewater in Agriculture

Project Partners:

Offline version of www.ais.unwater.org/wastewater

Members and partners of UN-Water member agencies are encouraged to register on the UNW-AIS+ platform to share water informed activities and projects. The platform provides a common transboundary space for sharing information and activities.

UNWAIS+ is managed by UNW-DPC

<http://www.ais.unwater.org/wastewater/>

These new additions make the UNWAIS+ an easy and accessible platform for capacity development tools to be used for sharing knowledge among UN-Water members, partners and programmes, and to engage in "learning by sharing". It has a modular architecture and is therefore able to expand to include new features and components of use to UN-Water members.

International Wrap-up Conference

- Synopsis, inviting workshop participants with success stories
- Complete institutional mapping and revised national report
 - Let us know of your activities (reportable post-workshop activities, achievements, challenges, needs assessment, etc.)

Your expectations and comments

- What have you learned which motivates you to promote safe use of wastewater in your country?
- What are your needs from UN-Water members and partners?
- What do you want to achieve?
