# The UN-Water Project on the Safe Use of Wastewater in Agriculture

A collaboration of UN-Water Members and Partners FAO • WHO • UNEP • UNU-INWEH • UNW-DPC • ICID • IWMI

Short introduction of the  
concept of the global level  
proposal

*Dr. Jens Liebe, UNW-DPC*

# The Global Level

## PHASE I

### STATUS AND CAPACITY NEEDS ASSESSMENT

Key capacity clusters

Economics, Resource Recovery and Reuse	Institutional Settings and supportive Policy	Risk Management and Use of WHO Guidelines	Diagnostic Analysis of Wastewater use
--	--	---	---------------------------------------

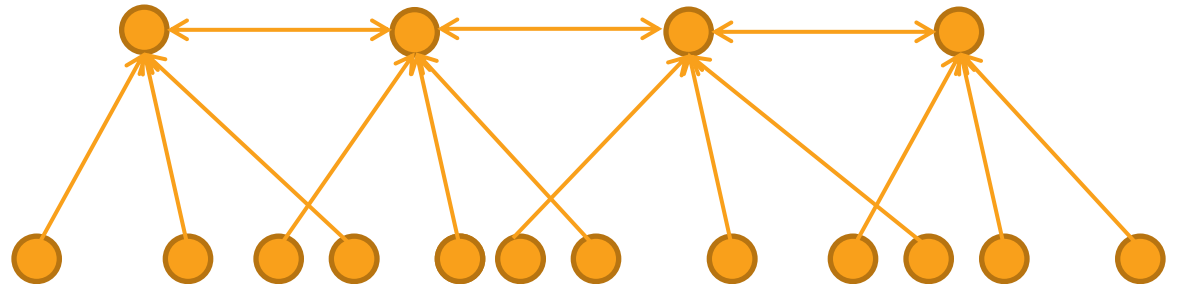

## PHASE II

### CAPACITY DEVELOPMENT

National

National capacity needs are addressed in selected countries and good practices transformed to best/model practices

Regional

Global

Awareness is raised and knowledge is shared and improved at regional and global level

ICID-CIID

IWMI

# The Global Level – Key Questions

ICID-CIID

1. What are the needs at global level?

2. How can we address and mitigate general needs at global level?

3. How can we best raise awareness?

# Global level proposal

## Potential key aspects

- *Dissemination of online and reference material*
- *Distribution of guidelines and resources*
- Development of eLectures and eLearning modules
- Raising awareness at global level
- Supplementary materials to guidelines
- Creation of global communities of practice and exchange of good practices between regions
- ...

# To bear in mind in our discussion

## Key aspects important for proposals

- What exactly is most needed?
- Who is the target group?
- What is the projected outcome of the measure?
- What are the best methods/strategies to achieve the goals?
